## MATTHEW PRYOR

### Profile

Most recently I graduated from a full-stack web development bootcamp through the University of Toronto. What I have learned has changed my perspective on software engineering. Before this, I graduated from university and was ready to take on the world as a certified teacher, however, my feelings towards the teaching profession shifted as a result of COVID-19 and my passions in general. My entire life I have been fascinated by computers, the internet, video games; all things tech-related, really. I pursued this career change so that I may enter a new industry and job market entirely, in order to follow my passion for technology and learning. I am a hungry, tech-savvy individual who works well in any work environment, and I am ready to learn whatever is required for the job in order to be the best contributor that I can be.

### Experience

#### **Confederate Secondary School - Teacher - Sudbury, ON — 2021**

For my final practicum to receive my Bachelor of Education, I was responsible for carrying out all duties that a full-time teacher would for a Grade 8 class in a virtual setting.

#### **Green Earth Landscapes - Landscaping Technician - Collingwood, ON — 2020-2021**

Working as the right-hand-man to the owner of Green Earth, I was responsible for helping build stone pavement patios, walkways, natural stone retaining walls, backyard redesigns, and many other kinds of renovations; and customer service.

#### **YMCA Geneva Park - Trip Leader, Outdoor Skills Facilitator, Rama, ON — 2019**

I was responsible for planning, preparing and executing several canoe trips. While not preparing for trips, I was using my leadership skills to teach adolescents to become leaders themselves, through inter- and intrapersonal skills development challenges.

### Education

**University of Toronto, Toronto, Ontario — Full-Stack Development Certificate, 2022**

**Laurentian University, Sudbury, Ontario — BPHE, 2020 - BEd, 2021**

### Skills

If I am interested in something, I will do whatever I can to learn more about it, and I am always learning new things. I take initiative and help out other members of my team or work group where possible. I enjoy collaboration and feel as though my positive attitude has allowed me to become closer with my colleagues throughout my previous work experiences.
