Profile

I graduated from university and was ready to take on the world as a certified teacher, however, my feelings towards the teaching profession shifted as a result of COVID-19 and my passions in general. My entire life I have been fascinated by computers, the internet, video games; all things tech-related, really. Most recently I have been studying full-stack web development online through the University of Toronto to pursue my passion for technology and to enter a new industry and job market entirely. I plan on reaching out to businesses and companies looking for hungry, tech-savvy individuals like myself to improve my skills and become a professional developer.

Experience

Confederate Secondary School - Teacher - Sudbury, ON — 2021

For my final practicum to receive my Bachelor of Education, I was responsible for carrying out all duties that a full-time teacher would for a Grade 8 class in a virtual setting.

Green Earth Landscapes - Landscaping Technician - Collingwood, ON — 2020-2021

Working as the right-hand-man to the owner of Green Earth, I was responsible for helping build stone pavement patios, walkways, natural stone retaining walls, backyard redesigns, and many other kinds of renovations; and customer service.

YMCA Geneva Park - Trip Leader, Outdoor Skills Facilitator, Rama, ON — 2019

I was responsible for planning, preparing and executing several canoe trips during my second summer working at GP. While not preparing for trips, I was using my leadership skills to teach adolescents to become leaders themselves, through inter- and intrapersonal skills development challenges.

Education

Laurentian University, Sudbury, Ontario — BPHE, 2020 - BEd, 2021

Skills

If I am interested in something, I will do whatever I can to learn more about it. I like to take initiative and help out other members my team or work group. I enjoy collaboration and feel as though my positive attitude and determination are an important asset to any work environment.
